

Stop the Backdoor Liquor Tax

- ◆ The ABC Board has proposed an increase in the wholesale and retail markup (price) of bottles of liquor to 35%.
- ◆ The markup does not meet the regulatory requirements of conditions that warrant a price increase.
- ◆ Money from the increase has been earmarked in the budget to fund the district attorneys and courts.
- ◆ This should not be allowed to be done by the ABC Board, it is a backdoor tax and usurps the taxing authority of the legislature.
